

Welcome to Aqua class's monthly newsletter.

In our unit awards, computing lessons, Aqua pupils have been using Paint 3D to create some amazing works of art! They worked on the background colour and imputed a variety of images from different sources. Great work!

Aqua pupils took part in a virtual workshop run by Sky. They learnt about the different types of jobs that Sky can offer together with apprenticeships and they watched a video about the building of the new Sky site in Elstree. After the workshop was finished they talked together as a class about what they had seen and what types of jobs they would be interested in.
