

In Lime class our topic this half term has been fairytales. Each week we had a different fairytale focus. We have really enjoyed joining in with the sensory stories. We have also loved retelling stories in our own way!

In Maths we have been practising our number recognition, from tasks like matching a piece of numicon with its numeral, ordering numbers to making simple number equations and making numberbonds to 5 and 10.

In PE we have been making our own obstacle courses, this involved making a bridge for the three billy goats gruff to walk over and told our story as we make the bridge. This linked to two of our curriculum goals 'I can make an obstacle course' and 'I can retell a story in my own way'.

In Food Tech we have been practising our spreading skills and communicating the items we need and want in order to do this, from biscuits and icing sugar, to cracker and crumpets with different spreads.

Its been a busy month!
