

Blue class

Blue class really enjoyed all of their Easter activities. Pupils took some beautiful spring photographs which we made into Easter cards for their families. Pupils made Easter decorations for the class and took part in an Easter egg hunt!

In Science pupils in Blue class have started to look at electricity and how it is used. They took a tour of the school and noted a number of different types of equipment that need electricity to work. They looked at equipment that needed to be plugged into the electrical sockets all of the time and those things that were battery powered and only needed to be plugged in when they ran out of charge.
