

GREEN CLASS

Green class has had a great month working together in many different lessons. They have been practicing their communication skills by working together in an outdoor bingo game where they had to find different types of plants and insects to match their cards. They worked in teams to explore photos of places in and out of Bordon and they had to work out which was which. They are working hard on being able to ask the right questions to get the right information they need to complete tasks and experiments. Pupils also get the opportunity to engage in structured play where they play turn taking games, small world play and complete construction activities.
