

## Silver class

In Maths this month we have book exploring preposition. We have been reading the story *Rosie's walk*. We have been learning *on, in, under* and *next to*. We used objects from around the room to demonstrate our understanding.

In Food tech we have been practising our mixing skills. We made angel delight and cake mixture

February 2024

In music we have exploring different tempos. First stamped our feet and hit tapped the table fast, then slow. Once everyone could demonstrate the different we then chose instruments. As a class we played them slow and fast. I used symbols to show when the tempo had changed

As our science topic was melting and freezing, for creativity we made frozen paint lollies. We filled a plastic cup with about  $\frac{1}{4}$  paint and then added a few table spoons of water. We mixed this together and added a lolly pop stick. We put these in the freezer overnight then use them in creativity to make a picture.
