

Gold Class

Gold Class, apart from working hard to complete our MOVE, physio and OT targets every day, enjoyed exploring water and had many opportunities to do so due to the hot weather. We continued learning about plants, taking care of our sunflowers, watering them and enjoying the story about Sam growing and looking after his sunflower. We have also learned about the 'full' and 'empty' state in a sensory way, transferring the water from one container to another, observing the full/empty bucket, and most of all having fun exploring the water and water toys. We also continued exploration of sensory stories about mini-beast and nature, learning at the same time to recognise our feeling, preferences through sensory exploration.
