

Monthly Update

January 2026

This month

Students were welcomed back with snow but as this melted they soon settled back into their routines and gave a warm welcome to Mr Rees.

A new term and new subject topics. In Discovery, it's the five oceans including looking at the zones and which animals/plants live where (eg the blob fish). For Science, the new topic of materials has seen the creation of investigations to determine the different properties. Food tech and regional dishes so chocolate haggis was a must.

STAR OF THE MONTH

Tommy – for being a fantastic upstander by caring about his peers and trying to support them to make the right decisions.

FOOD TECH

A reminder for students to please bring in a lidded tub for food tech on Wednesdays so they can bring home what they have made.

ROCK STEADY

This half term, Charcoal class have Rock Steady on Fridays.
