Monthly Update

January 2026

This month

We all settled back in well after the Christmas holidays. We were very lucky to see some snow on the first day back!

In maths we started learning about money. We learnt that coins have different values and we counted in 1s, 2s, 5s, and 10s. We used real money. In science our topic is about materials. We are learning about the properties of a variety of material and we are trying out different materials to see if we can discover the properties

STAR OF THE MONTH

Corin – For good participation in lessons using his key words.

Food Technology

Can everyone please bring in a container on Tuesdays to take the cooking back home in? Thank you

This term it is our turn to play on the instruments with Rock Steady!
