

We have continued to explore rainforests and Antarctica by looking at globes, world maps, searching the internet and reading about them in books. Pupils have learned about the equator and how tropical climates are found around the equator. They have been learning about north and south and climates around the world. They have been very creative in Art, learning about different artists and being inspired to create their own artworks! They have learned how to make a quiche and designed their very own recipe of a quiche using different ingredients, including vegetables, herbs and meats. In PE they have been learning about cricket and developing their ball and game skills. They have all made excellent progress in PE and have really enjoyed it! In Science pupils have been learning about properties and changes in materials. They learned about evaporation by doing some evaporation activities and thinking about how they can see evaporation in everyday scenarios. They have also been learning about filtration and experimented on filtering solids and liquids. They have had some sessions in PSHE about staying safe and speaking out and using the 'buddy card' if they feel they need to. In Maths pupils are developing their number skills and continue to learn how to multiply and divide. Pupils have loved Forest School – making fires and even cooking on them! And of course, World Book Day was a highlight of this month!

Congratulations to our Stars of the Week this month!
