

LIME CLASS

A Marvellous May! We have enjoyed lots of outdoor activities in the sunshine this month. We have continued to update our own sunflower diaries which have helped us to understand what a plant needs and planted sunflowers and tended to them to keep them healthy. We even gave our own opinions on how we felt about some of our plants using a variety of communication aids. We have been looking at people who help us in our community and enjoyed a variety of role play activities and bucket time in this lesson. We have been looking at 'long/tall' and 'short' and making things 'longer', 'taller' and 'shorter' and a variety of number activities in maths, along with some fine motor, reading and lots of phonics activities.
