

## Red Class

We returned after the break and had a slight class change - we said hello and Welcome to Maddie who joined us from Gold and we said goodbye to Ayce and Ethan have moved to new classes: Blue and Orange. June has been a hot one and we have tried to stay cool. It has been a month of music: Samba , sound and Science. We have really enjoyed learning about Samba rhythms in our music lesson and used instruments to recreate some. In Science we have learnt how sound is carried through vibrations and used rice on a drum to show how the vibrations make sound waves. We also made paper cup telephones and used them to communicate with each other in the classroom - they were very successful and the children were amazed by how much they could hear through them. We have enjoyed Sports Day and welcomed family in to share this afternoon event as well as enjoying rebound therapy in our PE lessons. In PSHE we have been learning about different families and how our families are the same or different from others around the world.
