

Charcoal Class Monthly Update: June 2023

In PSHE the students have been learning about how to handle money safely. They have also been practising for our upcoming café trip by role playing paying for items.

Stars of the week
for this month are...

Adam
CJ

Congratulations!

In DT we have been researching and designing our picture frames. The students have been developing their problem-solving skills by making sure their picture frame can stand on its own.

In Science we have been learning about how sound works, as well as how it is measured. We also investigated whether the size of an object impacts on the sound it makes.

Charcoal loved going to Marwell Zoo, just a couple photographs to show you how much fun we had!
