

A magical May had by Blue Class!

This month has been non-stop with our amazing celebrations for the Kings coronation where we baked, decorated, celebrated, ate and found ourselves with some petting animals! We loved learning about the King, creating a crown, spectre and flags which we waved together with some of you parents! Our cakes looked amazing where we decorated them with the United Kingdom flag of fruit and entered it into the school bake off competition, coming second in secondary!

Even after that busy week, it didn't stop us creating some amazing pieces of work for all our other lessons. In cooking we have been preparing meals which included stir fry and egg fried rice.

We have been to the UK and France within our Unit Award where we have been exploring the culture, foods, festivals and language. Creating the flag for our countries to go our display and a PowerPoint of the gems within those countries!

In English we have been learning about personal information and how we can share it in different ways. We were all experts at writing it down on the computer in the computer suite which was our first time in there this year! Amazing Blue Class!

What else? In maths we have been comparing weights and finding heavy and light! Then in PE we have been practicing throwing, running and jumping! We are shot-put pros now!
