

Pink Class

April has been an exciting month, our new topic for this term is transport. We have had a lot of new activities in pink class this term like a visit from our friend Hope the dog, and Elsa our friend who comes to do yoga. In maths we have been practising our number recognition, we ordered numbers and practised writing some numbers, we have even matched it with some of the coins we have been learning about. We have continued our class café to continue practising our coin knowledge. In Science we have been beginning to look at different forces, started with 'push and pull'. In English we have been looking at a variety of books and carrying out a range of activities in relation to our transport topic, starting with transport that is found on land. In discovery we have enjoyed looking at how transport has changed over the years, looking at old and new vehicles. It has been lots of fun in pink class this month and we are particularly excited to welcome our new friend Eddie into pink class.
